***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bova et al (5,588,430). Bova et al disclose using camera data and image data to determine if the patient needs to be moved to assure that the target is located in the proper location for treatment. The patient on a patient couch is then moved based upon this data. Bova et al further disclose the use of markers detectable by the camera system. It would have been obvious to one skilled in the art to have provided means for moving the patient or the treatment device to ensure that proper positioning can be achieved. The means used to ensure proper positioning would be capable of moving either the patient on the couch or the treatment device. It should be noted that neither the couch or treatment device has been set forth and that any "apparatus" used to control proper alignment would be capable of functioning as set forth in the claims.
